

About the AI4FM Workshop *or what it might become ...*

Andrew Ireland

Dependable Systems Group

School of Mathematical & Computer Sciences

Heriot-Watt University

Edinburgh

Some Observations

*AI4FM = broad spectrum of activities & interests
seeking to exploit AI/FM synergies*

- AI and FMs have historic links, *e.g.*
 - *Kestrel Institute & KBSA Project '83*
 - *KBSA ('83-'90) KBSE ('91-'96) ASE ('97- onwards)*
- Lot's of advances in AI on various fronts, *e.g.*
 - *statistical techniques for reasoning & learning*
 - *behavioural problem solving architectures*
 - *new ideas in computational creativity*
 - *advances in neural networks for learning*

Some Questions

- What FM challenges might AI assist in addressing?
- What areas of AI should we be looking to exploit?
- Does an AI4FM workshop series have a role to play in addressing these questions?
- If so, how formal/informal should it be?
- Should we consider co-locating with other events, *e.g. relevant AI events?*
